

ABSTRACT OF THE DISCLOSURE

An image sensing apparatus capable of optically
correcting blur of an object image by an optical blur
correction unit comprises an image sensing unit for
5 converting an optical image of an object into image signals;
a display unit for displaying image signals converted by
the image sensing unit; a display ON/OFF switch unit for
switching between ON/OFF states for displaying the image
signals on the display unit when the image sensing apparatus
10 is ON and in an image sensing mode; and a control unit for
changing an operational state of the optical blur
correction unit depending upon the switching between the
ON/OFF states for displaying by the display ON/OFF switch
unit.
